WatchGuard® XTM 3 Series

WITH A NEXT-GENERATION XTM 3 SERIES SECURITY SOLUTION, YOUR NETWORK IS:

SECURE

- Application-layer content inspection recognizes and blocks threats that stateful packet firewalls cannot detect.
- Wide-ranging proxy protection provides robust security on HTTP, HTTPS, FTP, SMTP, POP3, DNS, TCP/UDP.
- A suite of security subscriptions boosts protection in critical attack areas for complete threat management.
- Optional Application Control keeps unproductive, inappropriate, and dangerous apps off-limits.

FAST and EFFICIENT

- Up to 1.4 Gbps firewall throughput and up to 240 Mbps VPN throughput keep data moving.
- Up to seven 1GgE ports support high-speed LAN backbone infrastructures and gigabit WAN connections.
- Interactive, real-time monitoring and reporting – at no additional charge – give an unprecedented view into network security activity so you can take immediate preventive or corrective actions.
- Includes the "Pro" version of the Fireware® XTM operating system for advanced networking features, including VLAN support, multi-WAN load balancing, and dynamic routing.
- Intuitive management console centrally manages all security functions.
- Role-based access control (RBAC) allows lead administrators to create custom roles for granular control.
- Drag-and-drop Branch Office VPN setup – three clicks and your remote office is connected.

FLEXIBLE

- WAN and VPN failover provide redundancy for increased reliability.
- Multiple VPN choices (SSL and IPSec) for flexibility in remote access, including support for Apple iOS devices such as the iPhone, iPad, and iPod touch.
- To maximize port utilization, any of the ports can be configured as Trusted, External, or DMZ.
- Choose the form factor that suits your needs – XTM 330 is rack mount, XTM 33/33-W is tabletop.

WIRED OR WIRELESS – YOUR CHOICE

- The XTM 33-W wireless model includes optional dual-band 802.11/n technology for much more responsive wireless network connections and expanded range. Allows users to access 2.4 GHz or less crowded 5 GHz band.
- Multiple security zones give administrators precise control over Internet access privileges for different user groups.
- Wireless guest services segment the Internet for customers/guests.

PREPARED FOR TOMORROW'S CHALLENGES

- Multi-layered, interlocking security protects the network while throughput remains high. No need to compromise protection for strong performance or vice versa.
- Advanced networking features ensure reliability and the flexibility to meet changing business requirements.
- Secure remote connectivity keeps the mobile workforce online and productive.
- Monitoring and reporting tools, included at no extra cost, support industry and regulatory compliance, with drill-down functions that make it easy to pinpoint specific activities.

RECOMMENDED FOR SMALL BUSINESSES AND BRANCH OFFICES

WatchGuard XTM 3 Series appliances deliver a new class of performance-driven security for growing businesses. The XTM 3 Series offers up to 1.4 Gbps firewall throughput and security features including full HTTPS inspection, VoIP support, and optional application control.

WHY BUY AN ALL-IN-ONE SOLUTION?

An all-in-one XTM network security solution integrates complete protection while slashing the time and cost associated with managing multiple single-point security products. All security capabilities work together for a holistic, comprehensive approach to network protection. Your IT staff has more time to focus on other areas of network administration, and your business saves money on support and hardware costs.

"WatchGuard makes a **great firewall and security appliance**, and backs it up with **tremendous and personal support.**"
